Office Action Summary

Application No.

09/265,493

Applicant(s)

TANNENBAUM, DAVID C.

Examiner

Daniel J Chung

Art Unit

2672

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 May 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____. 6) ☐ Other: _____

DETAILED ACTION

Claims 1-20 are presented for examination. This office action is in response to the amendment filed on 5-29-2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lathrop et al (5,097,427) in view of Lauzon (5,977,982).

Regarding claim 1, Lathrop et al discloses that the claimed feature of a method for applying texture mapping in per-pixel operations (See Abstract, Fig 1, col 2 line 60-col 4 line 25), the method comprising: receiving a plurality of parameters that define a pixel value at a pixel in a primitive (See Abstract, Fig 1, col 2 line 60-col 4 line 25); selecting a set of parameters (illumination values) from the plurality of parameters, the selected set of parameters (illumination values that changing by the light source) being associated with texture values (texture values representative of a selected texture pattern), one parameter per texture value, the parameters that are not selected defining [a set of unselected parameters] that have constant values over the primitive (See

Abstract, Fig 1, col 2 line 60-col 4 line 25, col 4 line 50-col 5 line 56); determining a texture value for each of the selected parameters by accessing a set of textures, the texture value for the selected parameters varying over the primitive (See Abstract, Fig 1, col 2 line 60-col 4 line 25, col 4 line 50-col 5 line 56); determining (Combining Function in Fig 1) the pixel value by using the unselected parameters with constant values over the primitive and the selected parameters with varying texture values over the primitive, wherein the set of unselected parameters are not associated with texture values and the texture values are associated with the selected parameters. (See Abstract, Fig 1, col 2 line 60-col 4 line 25, col 4 line 50-col 5 line 56)

Lathrop et al does not specifically disclose that “determining the pixel value by using the unselected parameters with constant values and the selected parameters with varying texture values”. However, Lauzon discloses such claimed feature of invention. [“Specifically...rendering engine 10 can be arranged in terms of components [“unselected parameters” in recited claims] which are constant, i.e.-do not change as a selected texture 50 is modified, and components [“selected parameters” in recited claims] which can change as a selected texture 50 is modified...” (See col 5 line 3-13, Also See Abstract line 6-16, col 2 line 17-col 4 line 6) It would have been obvious to one skilled in the art to incorporate the teaching of Lauzon into the teaching of Lathrop et al, in order to provide “reduced computational requirements and real time rendering in many circumstances” (See Abstract line 16-20 in Lauzon), as such improvement is also

advantageously desirable in the teaching of Lathrop et al for providing a fast image processing by eliminating the unnecessary computation for unchanged scene or images or to reducing the rendering time by eliminating the calculation for the contributions of lights in the scene during rendering.

Regarding claim 2, Lathrop et al discloses that displaying the generated pixel light value on a display device. (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Regarding claim 3, Lathrop et al discloses that the plurality of parameters includes per-primitive parameters, which are defined over the entire primitive. (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Regarding claim 4, Lathrop et al discloses that the primitive is a polygon. (See Abstract, Fig 1, col 2 line 20-35, col 2 line 60-col 4 line 25)

Regarding claim 5, Lathrop et al discloses that the plurality of parameters includes both scalar and vector parameters. (See Abstract, Fig 1, col 1 line 51-62, col 2 line 60-col 4 line 25)

Regarding claim 6, Lathrop et al discloses that the plurality of parameters includes one or more of emission material color, ambient material color, global ambient

light color, attenuation factor, ambient light color, diffuse material color, diffuse light color, specular material color, specular light color, a surface normal vector, a specular exponent, an environment map color, and a shadow color. (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Regarding claim 7, Lathrop et al discloses that the operation of determining the texture value further comprises the operation of:

Receiving texture coordinates for accessing the set of textures (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Accessing the textures in response to the texture coordinates to generate the texture values. (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Regarding claim 8, Lathrop et al discloses that the accessed texture includes a plurality of texture elements, the method further comprising the operation of:

Filtering the accessed texture elements of the texture map onto the selected pixel to generate the texture value associated with the pixel (See Abstract, Fig 1, col 2 line 60-col 4 line 25, col 7 line 39-48)

Regarding claim 9, Lathrop et al discloses that a light value is generated for the pixel value by evaluating a lighting equation that is defined in terms of the plurality of parameters. (See Abstract, Fig 1, col 2 line 60-col 4 line 25)

Regarding claim 10, Claim 10 is the corresponding device of claim 1. Thus, the rejection to claim 1 hereinabove is also applicable to claim 10.

Regarding claims 11-14, Claims 11-14 are respectively equivalent to claims 4,6,5 and 9, and thus the rejections to claims 4,6,5 and 9 hereinabove are also respectively applicable to claims 11-14, but applied in view of the rejections to base claim 10.

Regarding claim 15, Claim 15 is the corresponding computer graphics system of claim 1. Thus, the rejection to claim 1 hereinabove is also applicable to claim 15.

Regarding claims 16-20, Claims 16-20 are respectively equivalent to claims 6,5,9,4 and 8, and thus the rejections to claims 6,5,9,4 and 8 hereinabove are also respectively applicable to claims 16-20, but applied in view of the rejections to base claim 15.

Response to Arguments/Amendment

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Chung whose telephone number is (703) 306-3419. He can normally be reached Monday-Thursday and alternate Fridays from 7:30am- 5:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael, Razavi, can be reached at (703) 305-4713.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

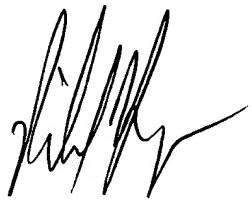

(703) 872-9306 (Central fax)
(703) 872-9314 (for Technology Center 2600 only)

Art Unit: 2672

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
